Explanation of Tabs

As you go through each screen, the tabs on the left side of the screen will turn from grey to blue or orange.

Start Page

Your Fleet and Site Obsolescence Breakdown

Search Criteria

Once you Login into POMS click on the "Search Criteria" tab
Fill in your search criteria and click on "Search"
Your results will activate in the "Search Results" tab

Search Results

Sort-able list of the search results (sort-able up to 1000 results)
Can sort by different criteria by clicking on the arrow next to "Sort By" at the top of the page
Can choose Ascending or Descending
Sort by: Equipment, AP 913, Quality Class [Q. Class], Description, Manufacturer, Model number, Parts on BOM
Can jump to a certain page by typing the page number into the box next to "Jump To" and clicking the arrow

POMS Quick Reference Guide

Equipment

Click on an equipment number on the "Search Results" page to go to the "Equipment" tab

This page has 4 tabs

Fleet View: Shows itemized view of stock codes assigned to the model number, can also get Work Order History and EPIX info (Shows Feet Bill of Materials for the selected piece of equipment)

Industry View: Shows how many sites throughout the industry have the selected manufacturer and model number; indicates if there is OIRD information available

Vendor Contacts: Gives the contact information for the model number, along with any comments the vendor provided

Collaboration: Shows breakdown by fleet of AP 913 classification, along with a list of installed locations

Reports

Can pull fleet or industry level reports on system or model statistics

Fleet Reports:

Interactive: More narrow, system level

Non-interactive: Available by clicking the "Download Fleet Reports" link; broader scope, gives a detailed view of Fleet/Site level POMS results

Industry Reports:

Interactive: View industry-wide statistics by manufacturer

Non-Interactive: Available by clicking the "Download Industry Reports" link; illustrates manufacturers with most industry impact by showing count of parts and count of affected equipment

Equipment Solutions

Provides quick access to solutions for obsolete equipment

Only provides results where there is a known solution

Solutions presented as replacement manufacturer and model number

Results sort-able by each header, click the header to sort ascending, again to sort descending

Click an underlined result to navigate to the tab associated with that information

Equipment: Links to Fleet View page

Model Number: Links to Industry View page

Replacement Manufacturer: Links to Vendor Contacts page

Vendor Models

Allows user to see all equipment model numbers for a specific vendor that meet search criteria (utilizes POMS Manufacturer Grouping)

Can see contact information and trace vendor back to parent company as well

Can search for Equipment/Tag Number [select '='] or Model Number by exact match or by similar matches [select 'LIKE']

Results show in 2 sections.

Vendor List: Left side of screen, shows vendor along with any sub-divisions or same name entries associated to it

Manufacturer/Model Number: Right side of screen; Shows model information matches based on the search results

Click a vendor name in the "Vendor List" to get the contact information for that division

Forecasting

Takes you to the PM Forecasting module
